

7

Bible

Bible Survey

Full Bible survey with personal application. Students visit all 66 books from Genesis to Revelation. Bible class study includes memory verses, Bible doctrine, and daily Bible reading.

Language Arts

Grammar and Composition

Students learn and practice fundamental language rules: capitalization, punctuation, sentence structure and diagramming, and the parts of speech. Composition assignments include summaries, and book reports.

Spelling and Vocabulary

Weekly spelling and vocabulary lessons

Literature

Interesting stories and poems selected for their emphasis on character. Selections dealing with seasons and holidays, family life, great men and women, young people who have accepted a challenge and legendary heroes.

World History

Thematic and cultural approach to world history and geography with emphasis on government, economy, religion, thought and learning, and arts.

Earth Science

Units of study include astronomy; meteorology; geology; and the hydrosphere.

Math

Saxon Math 87

Provides students with a solid foundation of skills and concepts needed for success in quantitative courses. Specific topics include ratio, rate, percent, similar geometric figures, indirect measure, fractions, decimals, and percents, integers, exponents, order of operations, variables, algebraic terms, inequalities, equations, functions, and graphing.
